GOLDEN RULES

I WANT TO BE SAFE
I PROMISE TO :

BELT UP
all passengers are my responsability
RESPECT THE HIGHWAY CODE
rules are there to protect us all
OBEY THE SPEED LIMIT
my car is made of metal, pedestrians and children are not
CHECK MY TYRES
both for wear and for correct inflation, including the spare
DRIVE SOBER
when I am drunk or on drugs, I am a danger on the road
PROTECT MY CHILDREN
keep them safe in car seats
PAY ATTENTION
calling and texting make me dangerous
STOP WHEN I'M TIRED
getting there late is better than not at all
WEAR A HELMET
motorbikes and bicycles don't protect my head
BE COURTEOUS AND CONSIDERATE
respect other drivers

1. Welcome

1.1 Introduction

Rally Italia Sardegna holds a particularly important place in my sporting heart. This because the Automobile Club of Italy, that I preside, is the Organizer and the life and soul of this event, but also and above all, because of the efforts me and my closest collaborators profuse in making this race survive inside a really difficult international panorama.

This event is now strong enough to be considered one of the best races in the World Rally Championship series. An important and hard work has been brought forward also thanks to the great support of Region Sardinia and his President, Ugo Cappellacci, which effectively worked with us in all these past years. From this shared effort and deeply-felt passion for this land and sport, born an extraordinary race and, for some reasons, quite peculiar and unique inside the international panorama.

An event created by a great professional and a highly qualified technical staff, but also by love and care for details. These are two important characteristics that all people involved and becoming protagonists of this race, like drivers, teams, manufacturers, feel immediately. Also spectators from all over the world are coming to Sardinia to enjoy a cocktail of sport, tourism and culture with a strong and matchless flavor.

Everyone finds in this race and in this land, great hospitality and helpfulness, which allow them to do at the best their job. At the eve of this important event there's nothing left for me but welcome everyone coming to Sardinia to enjoy 2013 Rally Italia Sardegna. I'm sure that it'll be for everybody an unforgettable experience and an extraordinary adventure to be lived to the end with joy and great passion.

Angelo Sticchi Damiani
President of Automobile Club Italy

1.2 Event's Presentation

Ceremonial start from Sassari center, a route hold in two days with 4 Special Stages each day, Monte Pinu as base of the free practice, the Qualifying Stage and the Shakedown, a new stage to be run at night: these are the news of 2013 Rally Italia Sardegna. Furthermore there is the linking with Rally Costa Smeralda, round of the Italian Rally Championship, like in 2011.

Nine years after the first edition of Rally Italy in Sardinia, the Italian WRC round will take place in summer and always on the territories that at this point became competition and World Rally Championship icons. Places like Alà dei Sardi, Buddusò, Pattada and the area of Sassari hosting the SS Castelsardo and SS Tergu-Osilo, while the night stage – preceded by a regrouping in Arzachena – will be disputed in Gallura.

The towns of the 2013 Rally Italia Sardegna are Sassari, which beautiful center will be the stage for the Ceremonial Start on Thursday June 20th; Olbia, which will host the Service Park on the vast port area of Isola Bianca, the Rally HQ at the Geovillage Hotel and the final arrival of the event and last but not least Arzachena, which will host the regrouping preceding the night stage, that will be run on one of the most fascinating and demanding stages of Rally Italia Sardegna.

1.3 Regulatory Power

Rally Guide 2, published in May 2013, has NO regulatory power. It is a document produced for all Teams, Competitors and Media representatives to prepare them in advance for the Italian round of the FIA World Rally Championship. Any further updates will be published on our website www.rallyitaliasardegna.com.

All car must have the eligibility document **imperatively** printed:

- Either on FIA stamped/watermarked paper
- Or on stamped/watermarked paper from an ASN only if the Manufacturer is of the same nationality as the ASN concerned.

Advertising on windscreen and windows
All cars must comply with Article 211 of the FIA International Sporting Code stating that: Windscreen and windows shall bear no advertising, with the exception of a maximum 10 cm high strip on the upper part of the windscreen, and, provided that this does not interfere with the visibility of the driver, and of an 8 cm high strip on the rear window.

FIA specific refuel couplings adaptor
Cars equipped solely with FIA specified refuel couplings and using commercial fuel available from gas stations must have the adaptor on-board that has to be shown at pre-event scrutineering.

9.4 Preparation before scrutineering

All cars must have their sump guards removed from the engine block, for sealing of the gearboxes and differentials but they have to be kept together with the car with the purpose of weighing.

Vehicles have to arrive at the technical scrutineering with plates and race numbers already on.

Forms Driver / Co-driver equipment sheet and Car security sheet must be filled out in its entirety and signed. These forms will be checked before entering scrutineering. In case the form is not properly filled in, the car will be rejected and a new scrutineerng time will be assigned.

The use of a part Homologated as a **"Joker"** on the **S2000-Rally** cars, must be declared in the relevant form during scrutineering and will be noted on the technical passport.

9.5 Personal equipment

All Entrants have to have and show at scrutineering, the personal equipment that drivers and co-drivers, will wear during the event. Personal equipment must by in accordance with Appendix L FIA 2013:

Frontal Head Restraint must be in accordance with Rule F.I.A. 8858-2010 or 8858-2002. Wearing a head restraint device approved by the FIA is mandatory for all entered drivers and all co-drivers. The Frontal Head Restraint Systems are listed on Technical Lists 29 and 36. For more details, "Guide for the Use of HANS® in International Motor Sport", published by the FIA Institute for Motor Sport Safety, can be found on www.fia.com, under the heading FIA Sport - Regulations - Drivers' Equipment - Head restraint.

Helmets must be in accordance with one of the recognized rules (see F.I.A. technical list n. 25). To use a Frontal Head Restraint, a compatible helmet has to be adopted. These helmets are identified by a glossy holographic FIA label as illustrated in FIA Technical List n. 29.

It is also possible to wear a helmet approved by the FIA 8860-2010 standard (see FIA technical list n. 33) (compulsory for priority 1 and 2 drivers) or the FIA 8858-2010 standard (see FIA technical list n. 41), these helmets are considered suitable for use with Front head restraints.

Overalls, underwear, balaclava, gloves, socks and shoes have to be of a type approved by the F.I.A. 8856-2000 rule (see also Technical list n. 27).

9.6 Cars arrangement for sealing

The sealing wire must be supplied by competitors.

All following spare parts, which use is restricted by the FIA World Rally Championship Regulations 2013, will be sealed,:

- **All competitors have to arrange on the engine block of their cars one hole and thread for the sealing (not on the engine head!).** The wire has to be long enough in order to fit a plate and a seal easily and quickly on a visible place when the front bonnet is opened.

- On all turbo-charged cars, holes and thread have to be arranged, in order to allow the sealing of the turbocharger, in accordance with Articles 254.6.1 (Group N), 255.5.1.8.3 (Group A) and 260D.304-1 (Group R). According to these Articles, the holes have to be made on the screws of the restrictor, of the compressor housing and on the central carter or can be made directly on these elements of the turbocharger, in order to make the sealing thread prevent the separation. The restrictor could be checked during the scrutineering.
- For the sealing of transmission parts, the sealing thread should pass through 2 bolts at least. On non-priority drivers' cars, the transmission (gearboxes and differentials) won't be sealed.

These arrangements have to be placed in accessible areas, in order to accelerate the sealing operations, and be visible for checks at the Parc Fermè in case of a Rally2 start.

- The maximum distance between the fixing points (bolts and/or casting) and the first aluminum seal, should be 20mm. All parts (turbocompressor, transmission, etc.) will be sealed as per the following photo.
